8. ☒ Examiner's Statement of Reasons for Allowance
9. ☐ Other: \_\_\_\_\_

The following is an examiner's statement of reasons for allowance:

The prior art of record, either alone or in combination, fails to anticipate or render obvious the herein claimed cement paint and dry blend for the preparation thereof. The prior art fails to teach or suggest that the vitreous and calcareous aggregate particles should have sizes similar to each other. Throughout Applicant's specification, it is addressed that such limitation improves the quality of the paint for its intended purpose. The closest prior art of record, Cornwell, is directed to fireproofing paint and the same problems to be solved by Cornwell are not the same involved in the instant application. Accordingly, there is no reason to imply that inherency will naturally flow from the Cornwall disclosure of maximum particle sizes since Cornwell does not state that their particles have similar sizes; in fact Cornwell actually suggests that silica flour can be replaced by calcium carbonate. Accordingly, both components are not even required by Cornwell.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Elizabeth D. Wood whose telephone number is 571-272-1377. The examiner can normally be reached on M-F, 5:30-2:00.
